The typical mode of and basic procedures for applying machine learning in materials science are summarized and discussed. • For various points of application, the ...Regardless of the specific problem under study, a prerequisite for machine learning is the existence of past data. Thus, either clean, curated and reliable data ...In recent years, deep artificial neural networks (including recurrent ones) have won numerous contests in pattern recognition and machine learning. In mathematics, statistics, and computer science, particularly in machine learning and inverse problems, regularization is the process of adding information in order ...
